Printer Error Support

FULL SOLUTION

Methods to Resolve Error 0x000003eb.

Error 0x000003eb is a printer connectivity/installation error. There are numerous threads on the internet with workarounds and fixes, since I have not tried all of them; I will only be listing the ones that have worked for me. What's important to note is the error number; not the error message because this message varies depending on the operating system.

Reasons That Cause Error 0x00003eb

In General, the error states "Unable to install the printer. Operation could not be completed (Error 0x000003eb)"

The Printer Installation Error 0x000003eb states that 'Unable to install the printer. Operation could not be completed (error 0x00003eb). Before you start with the printer troubleshooting, one thing you need to check and make sure that your printer drivers are up to date.

Solutions to fix Canon Printer Error 5011 :

Method 1: Check and make sure Windows Installer Service is Running.

- Press the 'Windows + R' key together from your keyboard. Now, type 'service. msc' and click on the 'Enter' button.
- After this, find theWindows Installer Service' in the displayed list. Once you find it, double click on it.
- Check your Startup type. It needs to be set to the 'Automatic'. After that, click on the 'Start' button in case the service is not running already.
- Hit the Apply button followed by 'Ok'.
- Now, try to install your printer again.
- Hopefully, the aforementioned steps will surely help you to get out of the 'unable to install printer error 0x00003eb Windows 10' situation. In case not, proceed to the next step:

Method 2: Perform Clean Boot

- Important – You need to unplug the external devices from your computer and then try to install your printer.
- Sometimes the reason behind Printer Installation Error 0x000003eb is the third-party software conflicts with Microsoft Windows which causes a problem while working with Windows 10. To troubleshoot the problem, a user needs to perform a clean boot in their Windows 10 computer and diagnose the problem by following step-by-step guidelines.
- Once the user is done with the Clean Boot process, they can install the printer without any hassle and start printing the documents.

Method 3: Registry Fix

- Important- Backup the Registry before you execute the troubleshooting steps mentioned below:
- Press the 'Windows + R' key from the keyboard and type 'service. MSc. After this, hit the Enter button.
- Double click 'Printer Spooler Service'. After this, click on the Stop option to stop the spooler service.
- Hit the Apply button followed by the Ok.

- After this, you need to press the 'Windows + R' key from your device. EnterRegedit' and click on the 'Enter' button to go to the registry Editor'.
- Navigate through the Registry key depending upon the architecture of your device.

For 32Bit System
- "HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\Print\Environments\Windows NT x86\Drivers\Version-3"

For 64Bit System
- "HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\Print\Environments\Windows x64\Drivers\Version-3".
- In the next step, you need to delete all the keys listed in 'Version 3'. You need to click on keys and hit the delete button to remove them.
- Hit theWindows + R' key from your keyboard and click the Enter button.

Rename the folder to 3.old from 3.

At last, start the Printer Spooler service again and try to install your printing device.

I hope this will help you to fix Error 0x00003eb in few minutes. if it's not working you can check my website.
